

Versetta Stone™

The beauty of stone, perfect by design.™

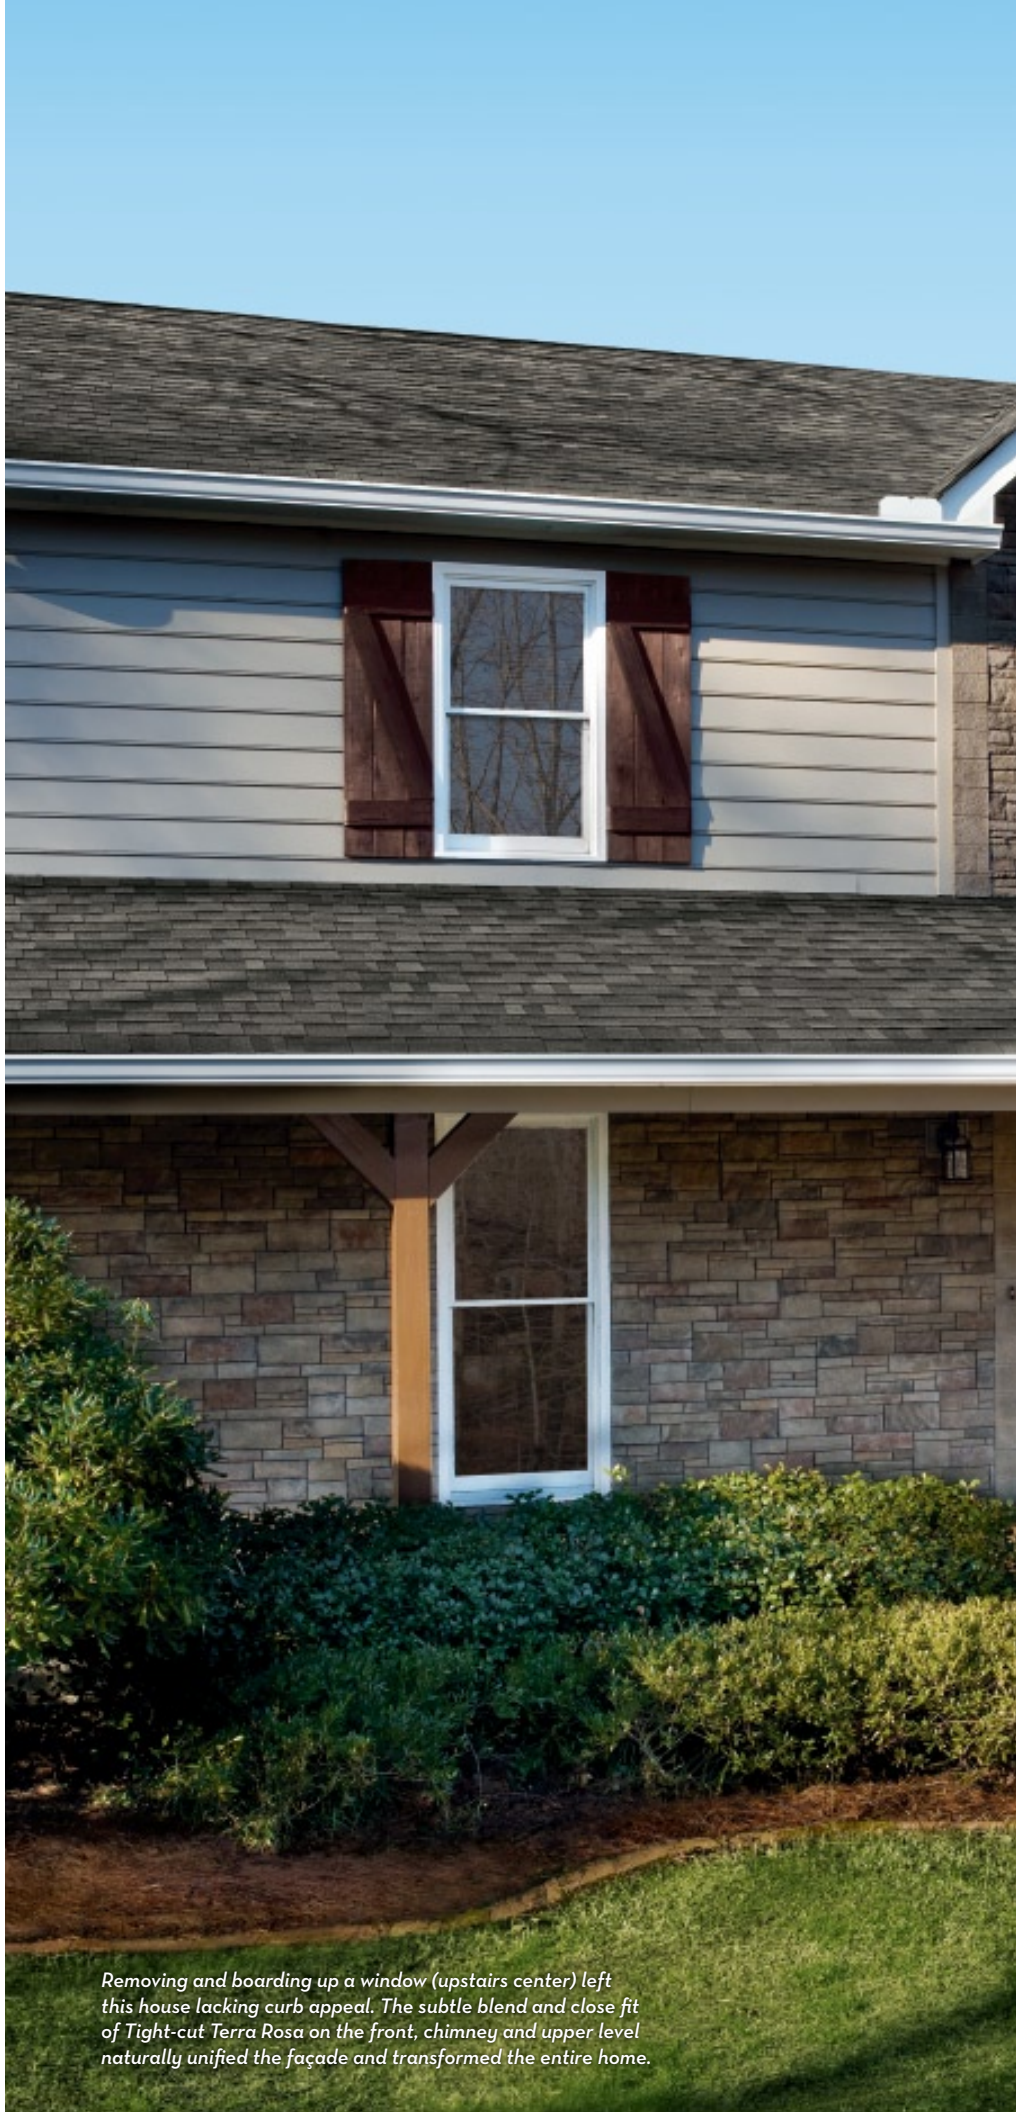

Tight-cut: Terra Rosa

All the beauty of traditional stone masonry. None of the hassles.

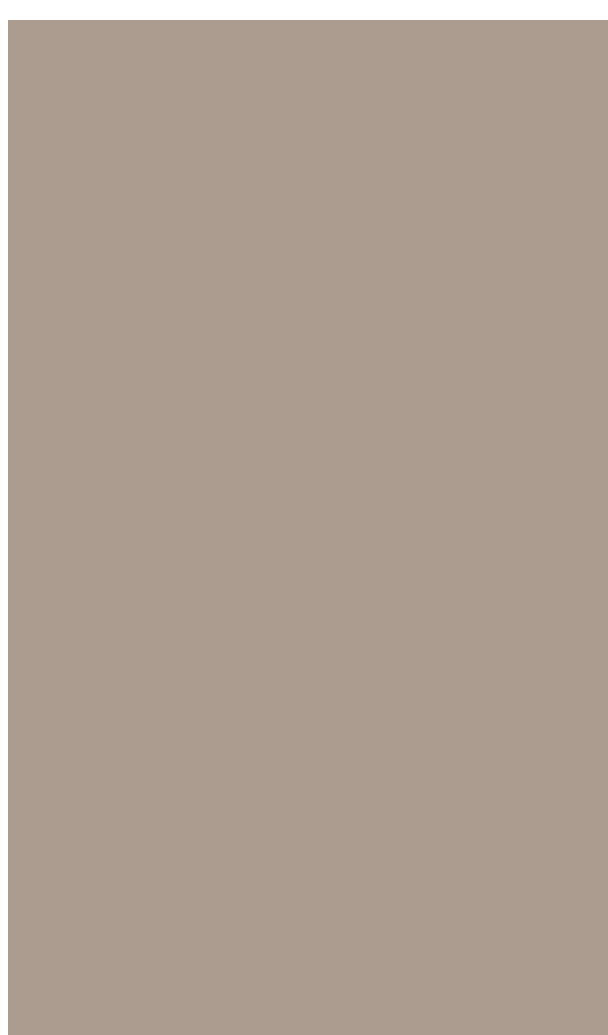

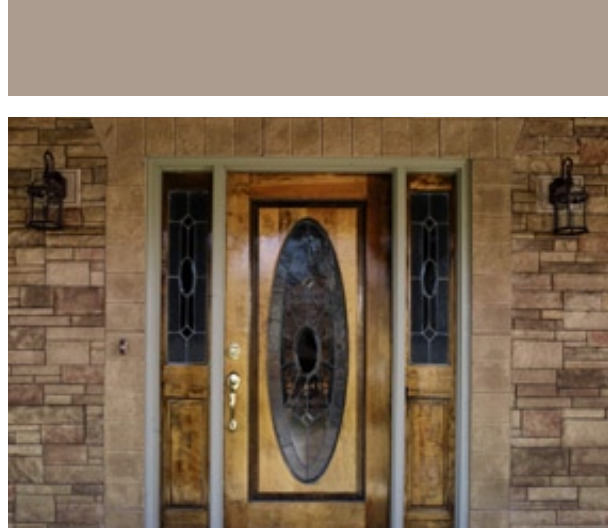

Now you can bring the timeless appeal of stone to your home. Introducing Versetta Stone™ panelized stone veneer: a non-structural, cement-based manufactured stone veneer that offers the authentic beauty of traditional stone masonry with a modern installation method.

Nature is our inspiration.

Our palette is inspired by places around the world and the colors and textures unique to each. We bring that authenticity to our stone veneer through patterns and stone shapes that precisely replicate natural stones. Cast in molds and hand colored with iron oxide pigments, we capture the subtle nuances found in nature. And, just like real stone, Versetta Stone™ panelized stone veneer withstands the normal weather in any climate. The difference? Versetta Stone™ panelized stone veneer is made of lightweight aggregate materials, which are approximately one-quarter the weight of full-thickness stone. The light weight and mechanical fastening system allows your contractor to install Versetta Stone™ panelized stone veneer without building footings for support, making it ideal for remodeling your home.

Removing and boarding up a window (upstairs center) left this house lacking curb appeal. The subtle blend and close fit of Tight-cut Terra Rosa on the front, chimney and upper level naturally unified the façade and transformed the entire home.

The product colors you see are as accurate as current photography and printing techniques allow. We suggest you look at product samples before you select colors.

After

Before

Simply endless ways to transform your home.

Owens Corning has poured years of experience into this stunning panelized stone veneer. The design options are endless, from adding drama to an entryway or column to dressing up a window, making a plain wall an eye-catching focal point, or adding wainscoting around the perimeter of your home. It's the perfect accent to transform your home—no matter where you use it.

▲ The addition of LedgeStone on the lower level of this home had a pleasant grounding effect. While beautifully accentuating the carriage-style garage doors, it also added character to the entire front.

◀ While this home is only two years old, the owners wanted to set it apart from similar styles in the development. Accenting the lower portion of the home with the vibrant colors and interesting texture of LedgeStone Plum Creek did just that.

Ledgestone

The rugged texture and purposeful irregularity offer an exposed and well-worn look that suggests years in the elements.

Tight-cut

The traditional look of quarried limestone fitted tightly together to emulate rural 19th century American architecture.

Versetta Stone™

The beauty of stone, perfect by design.™

Timeless. Reliable. Beautiful.

Owens Corning has been a world leader in building materials, systems and composite solutions for more than 70 years, and a Fortune 500 company for more than 50. Versetta Stone™ panelized stone veneer is in keeping with our high standard of excellence. With no need to paint, coat or seal, it is backed by a 50-year limited warranty including one-time transferability.* Versetta Stone™ panelized stone veneer products are also made from a minimum of 50% recycled content, which is validated by UL Environment™. Sustainability is, after all, a core business tenet at Owens Corning. Our company embraces the increasingly recognized definition of sustainability as meeting the needs of the present without compromising the future. We believe that being good neighbors is a requirement, not an option.
