

Product Data

Driwall™ Weep Screed

Description

Driwall™ Weep Screed is used as a flashing and weep when paired with a weather-resistant barrier, or building paper and Driwall™ Rainscreen.

It provides a clean termination for stucco, manufactured stone and thin natural stone at the bottom of the wall.

The unique “V”-shape allows migration of moisture down the screed and away from the wall.

This product is required by all major building codes and the International Building Code at the bottom of all framed walls.
